FABRIC PATTERNS

SUMMER SUIT

Military summer uniforms consist of jackets and trousers, and they are produced in camouflage patterned fabrics in the colors of each country's army. Our uniforms, made of ripstop fabrics, are produced in accordance with the specifications of each order, with features such as breathability, non-sweat, non-odor, tear resistance, and water repellency.

The selection of accessories and designs for our uniforms undergoes quality control at international standards at every stage of production by our team of experts.

You can see our production of 600,000 units of summer uniforms in the 2023 model for the Ukrainian army as our reference.

Adjustable Sleeves for Jacket

TACTICAL BOOTS

Tactical boots are military boots designed to be worn by soldiers during combat or combat training, as opposed to during parades and other ceremonial duties. Modern tactical boots are designed to provide a combination of grip, ankle stability, and foot protection suitable for a rugged environment. They are traditionally made of hardened and sometimes waterproof leather. They provide durability, ankle support, and reinforced toe and heel areas. Comfort features such as cushioned insoles and breathable materials keep feet dry and cool. Tactical boots are also waterproof and breathable, resistant to wear and tear, and easy to put on and take off.

COMBAT

The combination of the cotton t-shirt with fixed sleeves is an advantage.

The simple combination of combat t-shirt with tactical vest is ideally functional and comfortable. The middle cotton part absorbs sweat better, last but not least it is comfortable to wear, which allows full mobility and concentration.

COMBAT

CARRIER VEST

Fabric: 600D Polyester Oxford
With molle webbing

The Operator vest is designed with BALCS cut soft armor panels as the foundation, providing optimal protective coverage while allowing for user mobility. It is equipped with MOLLE, facilitating the use of pouches for added convenience. This vest offers Level III-A protection and can be upgraded to Level III, Level III+, or Level IV as needed. Additionally, it features a robust drag handle at the back, making it highly practical in war zones or battlegrounds.

BULLETPROOF PLATES

BULLETPROOF PLATES

NIJ 0101.06 LEVEL III++ Stand Alone
2.650 Kg/pcs Hard Ballistic Plates

- Angle Cutted
- Special composite construction, multi-shot rated.
- No shrapnel effect occurs and bullets do not bounce.
- Water and damp protected.
- Fire proof
- 7.62*54 FMJ - 7.62*63FMJ
- Capacity of 10 shots
- 10 years warranty

NIJ 0101.06 LEVEL IV Stand Alone
2.650 Kg/pcs Hard Ballistic Plates

- Angle Cutted
- Special composite construction, multi shot rated.
- No shrapnel effect occurs and bullets do not bounce
- Water and damp protected.
- Fire proof
- 5.56*45 AP - 7.62*39 AP - 7.62*51 AP - 7.62*54 FMJ - 7.62*63FMJ
- Capacity of 10 shots
- 10 years warranty

BALLISTIC HELMET

FAST, MICH, PASGT
PE Ballistic material
NIJ IIIA 9mm FNJ
With side rail and NVG gear
Inner 7 pad suspension system
Weight: 1.55g ±0.05kg
Color: Greeneach, Black, Tan, OD

T-SHIRT

The fabric of our product is 95% COTON and 5% POLYESTER

Due to the polyester feature of the fabric, it gives comfort and flexibility when worn. It absorbs sweat from the body thanks to its absorbent feature.

Thanks to the flexibility on the collar, it does not disturb the neck. Does not irritate and bother the throat part.

There is a print on the left side of our product.

BOXER

The fabric of our product is 95% COTON and 5% POLYESTER

Due to the elastane feature of the fabric, it gives comfort and flexibility when worn.

Soft and flexible elastic is used on the waist part of the body.

It does not irritate the body due to the quality of the rubber used. It doesn't cause any inconvenience.

UNDERWEAR SUIT

The fabric of our product is 95% COTON and 5% POLYESTER

The product consists of 2 parts, upper and lower. Due to the polyester feature of the fabric, it gives comfort and flexibility when worn.

The cuffs of the upper body's sleeves and the lower body's legs are made of their own fabric.

Soft and flexible elastic is used on the waist part of the lower body. Thanks to the elasticity and softness of the rubber, it does not cause any discomfort to the waist.

It can breathe directly from any skin.

The collar of the upper body is made of its own fabric. It sits on the body and does not cause discomfort to the throat.

RAINCOAT & PANCHO

ELECTROMAGNETIC RADIATION PROTECTIVE WAISTCOAT

Features

1. Protective frequency band: 10 kHz-30 GHz
2. Shielding effect: electromagnetic rays effective and the protection value reaches 99.99996.
3. Good conductivity and shielding effect
4. Good thermal conductivity
5. Good ductility
6. Easy extrusion processing
7. Good corrosion resistance and weather resistance
8. Anti-friction performance, Anti-friction times can reach times.

Used for high level electromagnetic protection:

- Industrial high frequency furnaces
- Mobile communication
- Computers
- House team
- Transmission stations
- Medically
- Control zone interference
- Electronic information interception
- Indoor professional protection
- Military information security products
- Astronaut Suits
- Spacecraft
- Radiation protective clothing
- Radiation protected curtains
- Celi phone bags
- Radiation-protected computer case
- Touch screen gloves
- Protective tents
